from abroad
(VTT Group
2018)

Towards a brighter future

Through science-based innovations – since 1942

Finland's – and VTT's – 24 years in EU

- Science and research do not recognise national borders, but operate across the borders.
- The year 1995 eased Finland's connections to Europe. This supported well VTT's targets to create sustainable growth and wellbeing for our customers and the society.
- Challenges are global, and our operating field is global.

Opportunities in the world of huge challenges
