

Innovation but Entrepreneurship!

Less bricks, more soft, trust outsourcing, focus on impact + scale-up

- Understanding (really) the entrepreneurs' ecosystem
- Respecting (sincerely) the entrepreneurs needs
- Interacting (constantly) with businesses, from micro to mega
- Focussing (seriously) on Entrepreneurship
- Celebrating (warmly) your territory as a hot entrepreneurial spot
- Empowering (frankly) entrepreneurs on RIS3 governance
- Making (massively) use of open professional networks & NGOs
- Trusting (openly) large corporates & open innovation
- Protecting (equally) outsiders & challengers, not only usual suspects

How future regional innovation ecosystems will look like ?
