What is the ideal concept of an ERA action? (ERA Forum of 25 May)

In addition of the **priority areas of the Pact for R&I**, the objectives of the ERA and the criteria – **relevance and viability** – set out in the Council conclusions on the future governance of ERA, ideal actions should have:

Added-value and relevance at EU-level

- Reduce complexity of actions
- Self-standing with impact beyond existing programmes/activities/instruments and fills a gap identified in the gap analysis
- Action needed at EU-level

Results-focused

- Scope may vary but all actions need tangible outcomes
- Task and finish-bound
- Strong and easily communicable narrative
- Needs to be implemented between 2025-27

Co-creation

- Co-creation between different actors (e.g. Commission and Member States)
- Cooperation of different actors to reach beneficiaries and create ownership
- Addressing needs not interests
- Strong and easily communicable narrative

ERA Forum of 25 May: Overall agreement that these should feed into the definition of future actions.
